## Generating a Smarthinking Token for Mobile Applications for iPad and Android Devices

Upon first access of Smarthinking, students are asked if they want to generate a token.

If students do not take the pop-up offer for the token when initially presented, they can access the option to generate one from Manage My Account – Edit and then select generate token.

To generate a Token ID after the fact: Select Manage My Account, choose "edit account" and Generate token:

The system will generate a token that is used to activate use with our Mobile app.

## Inputting the Token to a mobile application

\*The images below were taken from an iPhone. Android devices may look slightly different.

When the application opens, you will see a login screen. First choose Log in using token ID. Next, enter your token ID and click Log In.

You now will have access from your tablet or mobile device.
